3、 Basic Structure

4、 Key Features:

- 1、 Used for all kinds of plastic and paper material**
- 2、 Die easily replaced**
- 3、 Margin of paper is easily adjustable**
- 4、 Smooth punching hole**
- 5、 Easy control and steadily**

5、 Operating procedure

1. Clean the oil grease outside of the machine.
2. Make sure that the power is on and the electric part is dry
3. Before the new machine starts to run, or using the machine after a long time lying aside, lubricating oil should be added to all the friction part to prevent wear and tear due to insufficient lubricating.
4. After confirmation of every part is in normal condition, turn on “Emergency” switch, then turn on “Power on” switch to start the machine. Step the foot switch to check whether the machine runs well. Only after confirming the machine runs well, it can be started.
